

Systems Engineer & Sysadmin/IT Operator

xorlab is an ETH Zurich Spin-Off company that develops solutions to defend against all types of cyber threats including sophisticated cyber attacks.

We are looking for a part/full-time employee

Tasks & responsibilities:

- Ensuring the operation of our entire IT infrastructure (customer services, server & client systems, internal network, development environment, continuous integration server, task tracking system, cloud services etc.)
- Engineering of a monitoring system for our critical infrastructure
- Monitoring and operation of our critical infrastructure
- Network management and operation
- Identity & access management
- IT onboarding/offboarding of employees
- Procurement of hardware and software
- Lifecycle-Management of hardware, software and cloud services

You have:

- BSc or MSc degree in Computer Science (or equivalent experience)
- A passion for engineering and operating systems and networks
- Service-oriented attitude and high quality standards
- Programming and scripting skills for automation
- Broad knowledge and interest in various network and software technologies (networking, security, Linux, Windows, Docker, Jenkins, nagios etc.)

What we offer:

- Early employee equity program
- Great environment to excel and develop your skills and personality
- Opportunity to build a great new IT security company with us
- Flat organization and a lot of responsibility
- Open culture where you can express your ideas and shape the future
